DETAILED ACTION

1. Claims 19-24 are pending.
2. In view of applicant's amendment filed 4/15/03, all previous rejections are hereby withdrawn.
3. The following is new ground of rejection.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office Action:

A person shall be entitled to a patent unless –

(e) the invention was described in a **patent** granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an **international application** by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 19-24 are rejected under 35 U.S.C. 102(e) as being anticipated by US Pat No 6,476,211B1 (filed July 16, 1998, PTO 892).

The '211 patent teaches an isolated CD39L4 polypeptide comprising the amino acid 100% identical to the claimed sequence of SEQ ID NO: 6 or the mature protein portion thereof (See reference SEQ ID NO: 5, in particular). The '211 patent further teaches various isolated polypeptide having phosphohydrolase activity comprising an amino acid sequence that has 93.5 % identity, which is at least 90% identical to the claimed sequence of SEQ ID NO: 6 (See reference SEQ ID NO: 25, in particular). The '211 patent teaches a composition comprising the reference polypeptide and a carrier such as tissue culture for making antibody, in vitro binding assays for antagonist or agonist activity (See column 19, lines 18-25, column 20, in particular). Claim 24 is included in this rejection because the reference polypeptide of SEQ ID NO: 5 inherently included the specific amino acid residues 67-68, 123-138, 167-187, or 194-214 of the claimed SEQ ID NO: 6 since it is an identical sequence. Claim 22 is included in this rejection because the reference polypeptide encoded by the reference polynucleotide of

Art Unit: 1644

- SEQ ID NO: 4 would also hybridize under stringent condition as recited in the claim to the complement of the claimed nucleotide sequence of SEQ ID NO: 5 since both nucleotide sequences encoding the same protein. Thus, the reference teachings anticipate the claimed invention.
6. No claim is allowed.
 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to "Neon" Phuong Huynh whose telephone number is (703) 308-4844. The examiner can normally be reached Monday through Friday from 9:00 am to 6:00 p.m. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (703) 308-3973. Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1600 receptionist whose telephone number is (703) 308-0196.
 8. Papers related to this application may be submitted to Technology Center 1600 by facsimile transmission. Papers should be faxed to Technology Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform to the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CM1 Fax Center telephone number is (703) 305-7401.
